About

I love working with scientists to learn about their research while simultaneously helping them make their work more open, reproducible and compliant. I enjoy having a variety of tasks, including teaching, consulting, and in-depth data management work. Collaborating with other data support staff and with researchers are among the highlights of my working week. I am an excellent organizer, very eager to learn and to help others, goal-oriented and a reliable and dedicated colleague.

Experience

Research data manager / Specialist Scientific Information

07/2021 - Present

Research Data Support, University Library
Utrecht University, the Netherlands

As a team, we support researchers with their data management practices through consultancy (DMP and dataset review, answering questions, etc.), workshops, and developing services and policy. Besides these team tasks, I maintain the open source Data Privacy Handbook, was involved in setting up a CKAN meta-data catalogue for developmental psychology datasets, and am sometimes embedded in research projects. All while regularly liaising with colleagues across the university and beyond.

Lab and data manager

04/2020 - 06/2021

Erasmus SYNC lab
Erasmus University Rotterdam

As data manager, I helped this research group with their open science and data management practices. As lab manager, I coordinated and supported lab-wide initiatives.

Data manager

03/2020 - 06/2021

Leiden Consortium on Individual Development
Leiden University

For a large multi-cohort, multidisciplinary twin study, I helped make the (meta)data FAIR and the documentation interpretable for future users.

Data manager

02/2019 - 02/2020

Brain and Development Research Center
Leiden University

I helped researchers with cleaning up their data and informed them about data management and open science practices.

Content developer and e-moderator

03/2019 - 02/2020

UMC Utrecht and Animal Welfare Body, Utrecht

I developed the contents of an online learning track for PhD students performing animal research, and was the e-moderator during the pilot phase, keeping contact with all involved participants, teachers and coordinators.

Education

Msc Neuroscience and Cognition (09/2016 - 02/2019)

Utrecht University

Research internship (9 mo., psychophysics and EEG, Utrecht) | Research internship (6 mo., functional MRI, Leiden) | Minor Science Education and Communication (6 mo., Utrecht) | Secretary for a two-day symposium committee

BA Liberal Arts and Sciences (09/2013 - 08/2016)

Utrecht University

Major Cognitive and Neurobiological Psychology | Minor Language Development

Voorbereidend Wetenschappelijk Onderwijs (VWO) (08/2007 - 08/2013)

Christelijk Gymnasium Beyers Naudé, Leeuwarden

Profile Economics and Society
